MRC PRACTICAL COURSES

A complete system for the diagnosis and treatment of malocclusion

Richmodent (Cologne) – The biggest *Myobrace*® Certified Provider in Germany

Today millions of children have malocclusion and maxillofacial development problems. While the demand for early correction of malocclusion is growing, not every professional can offer patients early treatment. During this course you will gain the necessary skills for you and your staff for providing effective, early, minimally invasive treatment for patients between 5 to 15 years.

Lecturers

Niels Hulsink
Int. training & productmanager

Edwin van Mensvoort
Training & support Germany

Marc de Rooij
International sales manager

Mireia Sierra Andres
Training & support Spain

Niels van der Valk
Training consultant

In this course you'll learn how to implement myofunctional protocols and activities in a correct way with the Myobrace App, developed by Myofunctional Research Co. These activities are available as an app for mobile devices (IOS & Android) and computers (Mac Os X and Windows). This app helps you to get the best possible results in correcting malocclusion and will keep the patient motivated during the entire treatment.

Quizzes and interactive animations, especially designed for kids, remind them to do the activities on a daily base. Hereby enhancing compliance regarding the recommendations of the doctor. This results in breathing and swallowing correctly, having their tongue in the correct position and training all perioral muscles, as well as taking care of an optimal and stable result in an early orthodontic intervention.

Audience: Dentists, Orthodontics, Clinical staff and managers

Language: English

Key aspects of this course:

- Soft tissue dysfunction and identifying the underlying causes of malocclusion.
- Myofunctional orthodontics - The way forward.
- How to make it work - Patient education brings a new dimension to your treatment and practice.
- Implementing myofunctional orthodontics - Putting it together for a win/win situation in your practice.

This course is the first step for you as a doctor or clinic to enter the Myobrace Member program. Being a Myobrace Member will allow patients to distinguish you as an expert in this treatment method. After this course, you will be able to effectively use myofunctional appliances, as well as to offer comprehensive biological treatment of malocclusions to your patients that is more effective and stable than the treatment your competitors can offer.
